

In response to the growth in online sales, CDN has expanded its photography assets. Beginning with the Best Sellers, multiple views of the best-selling models are now available. Additional products will be added to the photography library over time.

The images follow the evolving standard of providing a main image, then front, detail, top, side, bottom and back views as needed. Finally, dimensions are provided on the most appropriate view and the file names reflect the content.

SIZES AND USAGE

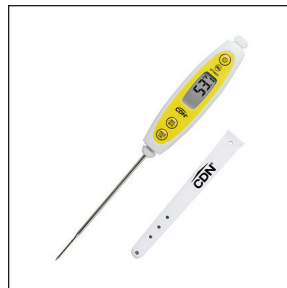

These images are available in multiple sizes for both print and screen use.

- **1.4-inch High Res - Printing** (425×425 pixels) – these are the size used for the price lists and catalog
- **3.5-inch High Res - Printing** (1050×1050 pixels) – these are the size used for the datasheets
- **10-inch High Res - Printing** (3000×3000 pixels) – these were originally developed for special requests and the files are very large
- **800×800 pixels – Screen** – these are the size used for the CDN website
- **1500×1500 pixels – Screen** (5-inch) – these are the most popular size requested by other websites

The key to selecting the correct size image is to first know **how** it will be used (screen or print) and then choose the size closest to the **size at which it will be used**.

Links to the 5-inch screen version of the images are in the Excel version of the current price list. For other sizes and uses, please log in to the secure website and look in the Photography folder.

Please take advantage of these new resources to enhance the customer experience at every touchpoint and build on the superior customer service that CDN has become known for.
